March 19, 2021

Dear Valued Guerbet Customer:

Guerbet appreciates your partnership and wanted to provide an update on the rolling supply interruption you may have experienced with Optiray® (ioversol injection). Due to the COVID-19 pandemic and raw material testing interruptions, we are experiencing production delays, and this is causing disruption to supply of the Optiray range of products.

Guerbet is diligently working to resolve the issues as quickly as possible and will continue to build and increase our Optiray stock levels. The expectation is that Optiray stock levels will continue to recover through May 2021 to satisfy current open orders to meet the customer demands.

Guerbet recognizes the importance of patient care and will continue to identify potential SKU substitutions as product becomes available to assist in meeting your and your patients' expectations.

If you have any questions, please contact your distributor, Guerbet representative, or the Customer Service Department at 877-729-6679, email customer.service-us@guerbet.com.

We appreciate your continued patience as Guerbet works to resolve these delays.

Sincerely,

Thomas McLaughlin
