Guerbet: Innovation and French Cooperation in the Spotlight at RSNA 2025

Villepinte, November 17th, 2025: GUERBET (FR0000032526 GBT):

At the upcoming RSNA (Radiological Society of North America) in Chicago, from November 30 to December 4, 2025, Guerbet reaffirms its commitment to innovation in medical imaging, advance training, and international collaboration.

This year, Guerbet will showcase **Elucirem™ (Gadopiclenol)**, our macrocyclic gadolinium-based contrast agent. With its **high relaxivity** and **exceptional stability**, Elucirem™ delivers image quality comparable to currently available macrocyclic gadolinium-based agents, while using **half the amount of active ingredient**. This breakthrough reflects Guerbet's ambition to provide solutions that are both high-performing and responsible, serving healthcare professionals and patients alike.

In addition, an **exhibition of patient cases** will highlight the critical role of **Real-World Evidence (RWE)** in advancing radiology practices, demonstrating how real-life data helps improve patient care and guide clinical decision-making.

Our **Open Theater** will host interactive sessions focused on key topics such as increasing relaxivity and reducing gadolinium doses, the impact of volume and concentration in GBCA administration, and essential updates on contrast agent safety.

Finally, with **France as the RSNA 2025 Country of Honor**, Guerbet is proud to welcome the **French Pavilion** on its booth, dedicated to members of **French Healthcare**, to foster dialogue and cooperation around innovative health solutions. French Healthcare is an initiative that brings together companies, institutions, and healthcare stakeholders to promote French medical and technological excellence worldwide.
